Figure the number of sections for each line by dividing the length of each line in inches by 96. Round any remainder up.
Ex. (43 ft. x 12"): 516"/ 96 = 5.2 or 6 sections.

Enter #'s in fields below with dashed boxes

The material calculations on this form are intended for rough estimation based on 8' section. Actual numbers may vary.

# of Sections (Divide each line by 96" and round up; add total # of sections):
